EVENTS & PRODUCTION

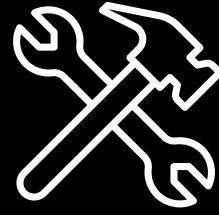

STAGE DESIGN & VISUALS

THE COMPANY

Simply put: we offer alternative event solutions in the alps. Through us you'll be able to offer new experiences to your guests with the surreal back drop of the alps.

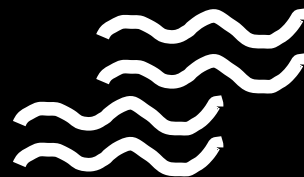

We can tailor the size of the stage to your specifications and needs. Whilst our curation process to the right allows you to have full customisation and control over your event

We handle all aspects of the stage construction, set up and break down. It will be set up and secured 24 hours ahead of each event.

The sound & lighting for our events is taken care of by one of the best audio/visual companies in Europe, RJ Music.

We've also teamed up with some of the best decorative companies in order to be able to deliver the exact theme required.

XL STAGE DESIGN

STAGE + PA CAGE + ADVERTISING WINGS

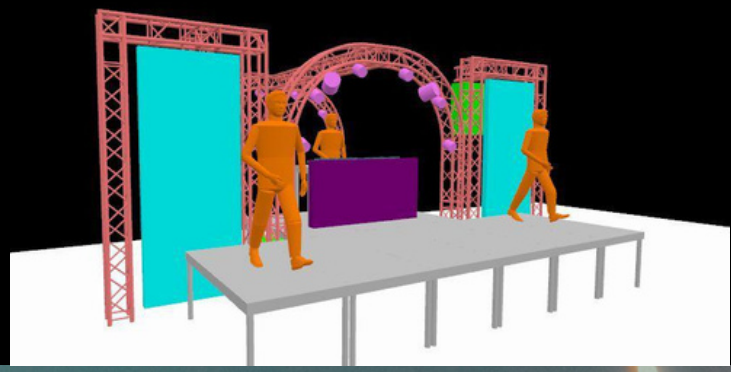

This combination is by far our most popular package. The photo above was taken in April at Le Taburle in Alpe D'huez.

The PA cage is the key addition here, the 6m x 6m structure allows the audio team to grid their speakers and concentrate the music on the crowd. This minimises the noise on surrounding areas considerably and was approved for use by the local police. It became a necessity by the end of the winter season to avoid noise complaints. We have the sound reports available from the events where the cage was used.

The stage is set to 3.2 metres in height, as are the 2 advertising wings which allow you to brand and market your event either side of the DJ/performer.

The decoration was supplied and fitted by a UK company and can be fully customised.

MEDIUM STAGE DESIGN

STAGE + ADVERTISING WINGS

In areas or venues where there are no surrounding areas to consider with regards to noise, the stage + advertising wings are more than suitable.

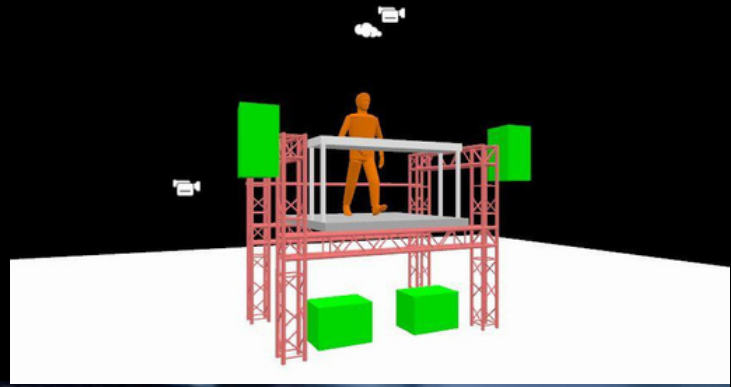

The PA system can be flown or stacked behind the advertising wings and you still get the same 3.2m focal structure of the curved stage for your performers.

DID YOU KNOW?

THE STAGE IS WEIGHED DOWN WITH OVER 1200 KG OF WEIGHT FOR EACH EVENT MEANING IT CAN WITHSTAND HURRICANE STRENGTH WINDS.

BOILER ROOM DJ BOOTH

BOILER ROOM STYLE DJ BOOTH

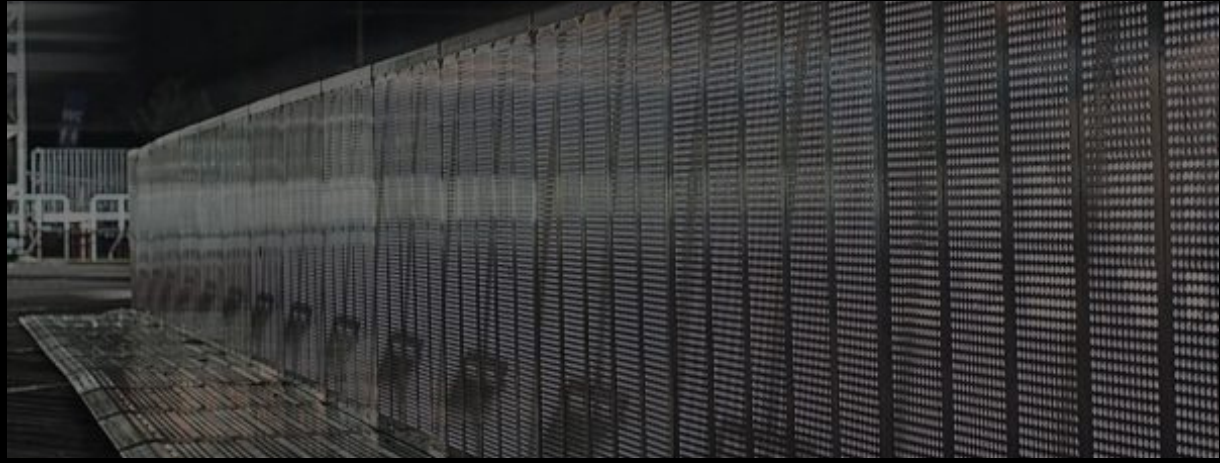

For the more intimate events we can create a compact but effective set up in the form of this surrounded DJ booth.

Setting up the DJ booth in such a way creates a unique event for the guests and gives 360 views of the performer.

LED screens can be supplied by our partners at RJ Music as seen in the visual above, what's displayed on the screen is completely customisable.

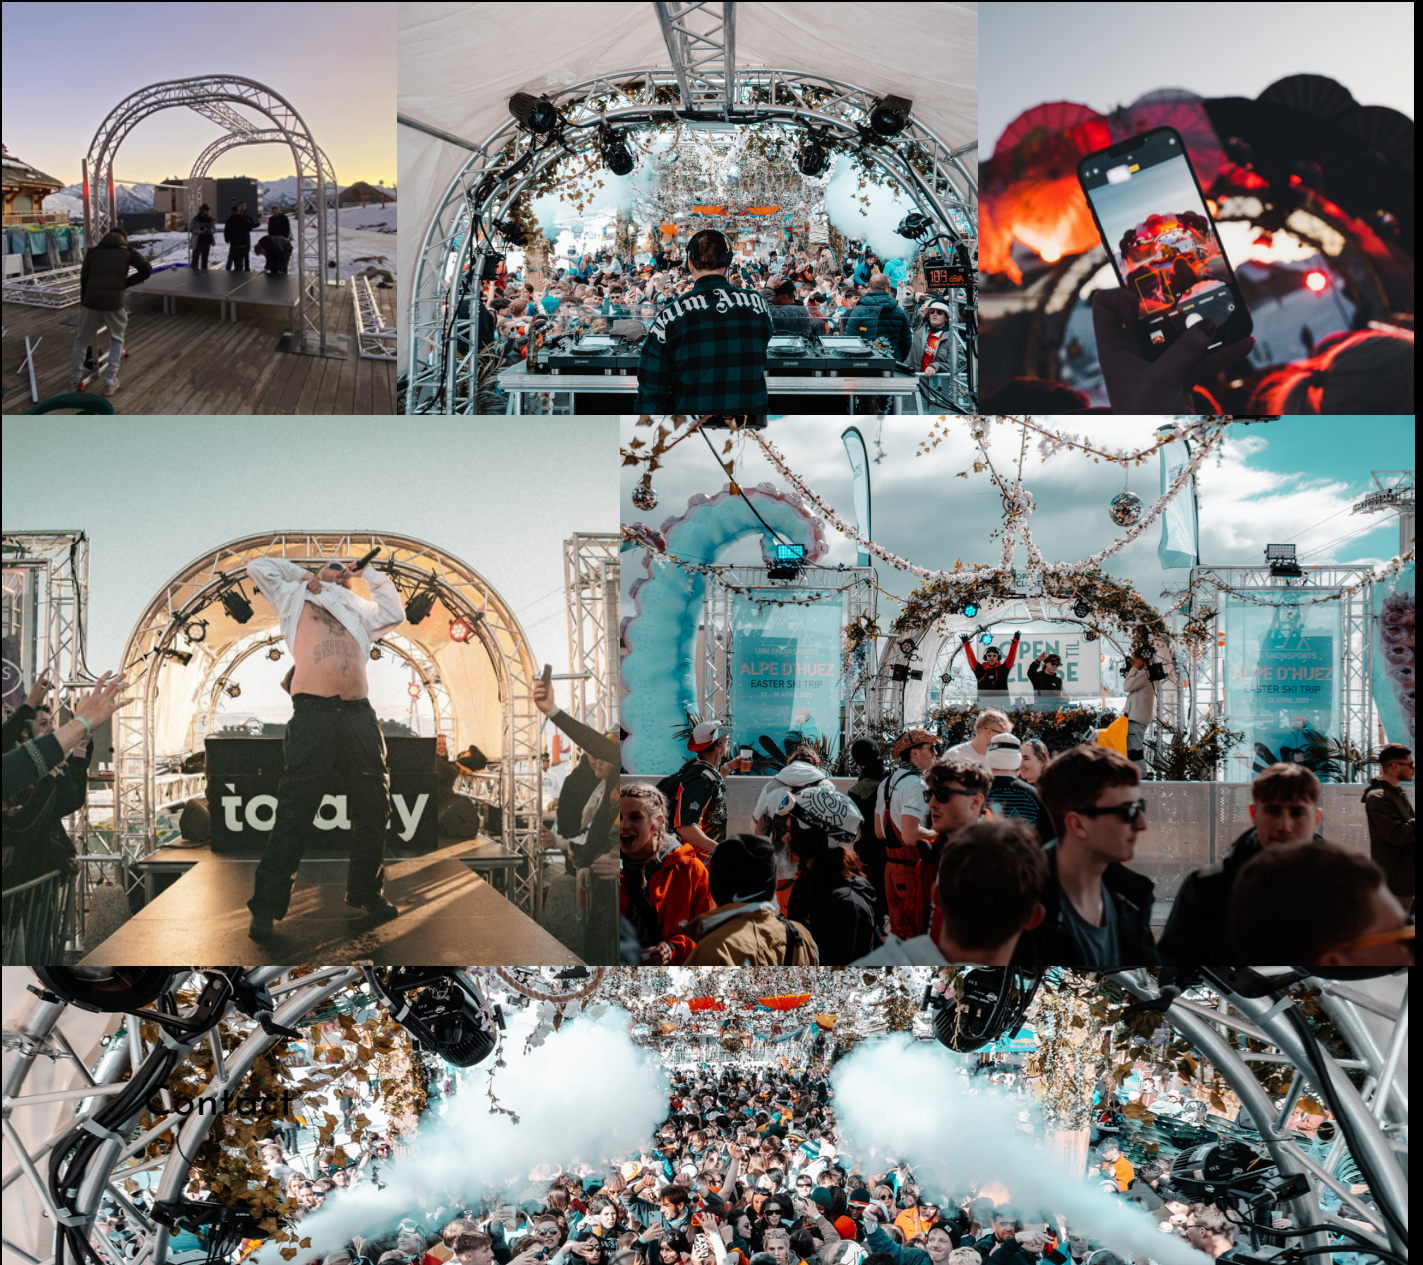

COMING SOON.

We'll be adding Mojo Barriers to our rentable items from August 2023. These festival grade safety barriers will add extra security to your event.
